

Tomato Flash Products Are Now Available

Fun-loving range of flash products with high functionality and design to fulfill consumer demand

Jerry Loke, Director of Micro Advisory and Mr. T.M. Ko signing the agreement of distributorship.

Micro Advisory (M) Sdn Bhd has launched the brand new Tomato Flash range of memory devices and has announced its appointment by Incito Technology Co. Ltd as the exclusive distributor of the Tomato Flash range in Malaysia, Brunei, Vietnam, Thailand, Philippines and Indonesia. The Tomato Flash range of memory products is manufactured by Incito Technology Co. Ltd. which is part of the Lite-On

Group, a world leading manufacturer of IT hardware.

Jerry Loke, Business Development Director, Micro Advisory (M) Sdn Bhd said, "Personal storage devices are no longer fully functional, they have become lifestyle items, even trendy accessories. With such ubiquitous use, consumers today are asking for design to match functionality. The Tomato

Sean Yew, Regional Business Development Manager, Micro Advisory.

Flash range of products is stylish, fun and distinctive, and they fill the niche in the market for trendy and functional personal digital storage devices. We are very excited with this new venture and we expect revenues of over RM14 million from Tomato Flash sales in the 6 designated countries over the next 2 years."

"Tomato Flash brings a fresh breeze to the digital memory storage market. We assure customers of the finest quality with our products and with the additional aesthetic elements we are

able to deliver a more vibrant 'feel' to their use," said T. M. Ko, President, Incito Technology Co. Ltd.

The full range of Tomato Flash products have been launched and includes USB flash drives, microSD cards, ComboSD cards, SDHC cards, miniSD cards, M-type card readers, PowerSD card set, CF cards and card readers. The products are ISO9001 certified and are backed by an International lifetime warranty. They also feature Samsung chipsets for reliability and are also lead-free and fully waterproof.

Maxis Introduces Internet2Go

Get connected while on the go – seamlessly

Maxis has introduced a new data package aimed at users who are constantly on the move named Internet2Go. The data package allows you to get connected to the Internet via your mobile device so that surfing via the mobile phone is possible. Giving you Internet over GPRS, EDGE, 3G and even HSDPA, a connection is guaranteed and seamless transitions between each data broadcast system can be realized with the use of a 3G-ready mobile phone.

This is how the Maxis 3G portal looks like.

The new service is available to all Maxis 3G postpaid customers in three different packages. For light users who rarely surf using their mobile phones, Maxis offers a 1 sen/kB rate at peak hours and 0.5 sen/kB from 12 a.m. to 7 a.m. Regular users who frequent the Maxis 3G portal are recommended to choose the 'Small Set' data package that charges only RM5 per month for 1MB of downloads with an additional of 0.5 sen/kB or 8MB of downloads at RM25 per month

with 0.3 sen/kB for subsequent usage.

Users who need to use the Internet on the move can now enjoy an offer from Maxis which gives them unlimited 3G data usage for only RM99 per month compared to the regular price of RM120 per month. To enjoy these benefits, you'll only need to dial *100# and select '2' for service or call any of Maxis' Customer care consultants at 123 from your Maxis Mobile.

Internet 2GO
Grab a byte to go.
 Surf on the move with Maxis Internet2Go. And enjoy seamless connectivity with GPRS, EDGE and 3G plus a speed rate of over 7.68Mbps with High-Speed HSPA/HS-PA.
LARGE SET
 Unlimited 3G data usage for only **RM99** per month. Promotional price is valid for 3 months only! From 1st June to 31st Sept 2007.
*100# and select '2' for service or call any of Maxis' Customer care consultants at 123 from your Maxis Mobile. The Package Policy will apply to all customers. To learn more about the Policy, visit www.maxis.com.my/internet2go
